

CHM-PE-A4DB 全自动薄膜封箱机 Fully Automatic Film Sealing Machine

CHM-PE-A4DB 全自动薄膜封箱机是由封切机和热收缩包装机共同组成，以热收缩薄膜为材料。在令纸裹膜后（切断和封口）进入热收缩包装机完成包装。整机结构紧凑占地面积小，采用先进光电，准确定位。令纸经过该包装机的包装后，具有外形美观、整洁、防尘、防潮、防破损便于搬运和储存。相比传统的纸箱包装可大大降低产品损耗且具有包装成本优势。

The CHM-PE-A4DB fully automatic film sealing machine is composed of a sealing and cutting machine and a heat shrink packaging machine, using heat shrink film as the material. After wrapping the copy paper with film (cutting and sealing), it enters the heat shrink packaging machine to complete the packaging. The whole machine has a compact structure and a small footprint, using advanced optoelectronics for accurate positioning. After being packaged by the packaging machine, the copy paper has a beautiful, clean, dustproof, moisture-proof, and damage resistant appearance, making it easy to handle and store. Compared to traditional cardboard packaging, it can greatly reduce product loss and has packaging cost advantages.
